

AMENDMENTS

In the Claims:

Cancel claim 5 without prejudice or disclaimer.

Amend claims 1 and 10 as follows:

1. (Thrice Amended) A two-layer laminate film, comprising:

- a) a first resin layer comprising a polyolefin resin and having a surface treated by a discharge treatment method that imparts excellent printability to the treated surface; and
- b) a mixed resin layer in which the resin consists essentially of polypropylene resin formed on and adhered to a surface of said first resin layer opposite the treated surface having said surface treatment,

wherein the first resin layer and the mixed resin layer each contain up to 800 ppm fatty amides comprising stearamide or erucamide and the mixed resin layer contains a first additive material comprising at least one crosslinked silicone polymer in an amount of about 0.1% - 0.5% by weight of the mixed resin layer and/or at least one silicone oil in an amount of about 0.02% - 0.2% by weight of the mixed resin layer, and a second additive material comprising at least one amorphous aluminosilicate in an amount of about 0.10 - 0.50% by weight of the mixed resin layer.

10. (Twice Amended) The two-layer laminate film according to claim 1 or 2, wherein

- the resin of the mixed resin layer consists of a polypropylene homopolymer.
